

this week will be to assess one of the "US Preventive Task Force Recommendation Statement," documents (choosing either the breast, cervical, or skin cancer article). In each of the breast, cervical, and skin cancer folders for Week 11, you will find the "US Preventive Task Force Recommendation Statement" article for each type of cancer. Please select only one of them for this discussion post. When providing your initial post, please focus on the following questions as you assess your chosen article:

- After reading the article, think about the screening recommendations described for that particular type of cancer. Consider the population (e.g., age ranges, sex, etc.), the recommendations, and the grade (i.e., A, B, C, D, or I) given for that particular screening procedure. After reading all of the information presented in the article, what are your overall reactions to the screening recommendations? Do you concur? Do you have hesitations or reservations about the recommendations? **Please explain why. (2 paragraphs of 4-5 sentences each)**
- Imagine you or someone you know is at risk of the cancer you have chosen for this discussion. Would you suggest that they follow the recommendations in the above article or would you suggest something different to them? Please explain why. **(1 paragraph of 4-5 sentences).**
