

### Final Assignment Questions

Make sure you defend all of your answers with facts from the readings. In other words, make sure I know you read the assigned articles and can explain your position based on information presented in them.

1. Assume you are an HIV Counselor and Tester. You have a 23-year-old individual in front of you to be tested.
  - a. Walk me through the steps you will go through to get them tested and give them the results; and
  - b. What would you do if the results were positive (i.e. what steps do you go through with the person)?
2. Do you think high school sex education courses (usually students are 15-17 when they take these) should include information about sexual orientation? Explain your position.
3. Do you believe sexuality research is important? Use material/experiences from class to support your answer.
4. Your friend, Steve, who is 22, discloses to you that he has a long history of premature ejaculation which has been very embarrassing and frustrating to him. He heard about Viagra, and asks you for advice about whether or not he should try to get a prescription for it. What advice do you give him?
5. This is a multi-phase question.
  - a. What is BDSM?
  - b. What is the prevalence of BDSM in the United States?
  - c. At what age did people report that they first experienced fantasies or feelings that they later realized were related to BDSM? And
  - d. How important is consent to BDSM practitioners?
6. What is the squeeze technique and what is it used for?
7. Define sexual ethics and give an example of an issue in our world revolving around sexual ethics.
