### Personal Mission Statement Speech

Ladies and gentlemen, my ambition to study dental hygiene develop out of my childhood experience. Having visited the dental hygienist several times when growing up, I fully wanted to fully understand the gums and mouth physiology. I am fully aware of the hygienist's major role in maintaining a patient's dental shape and, consequently, assisting patients in achieving general health via cautious devotion to oral conditions. My studies have made me understand the prevalence of periodontal infections among different patients who seek treatment at the community dental station where I volunteer during the school holidays. Upon completing my studies, my goal is to ensure that we focus on patient education and preventive approaches to managing dental hygiene.

As a dental hygienist, my job will entail preventing infection through advice, treatment, and therapy. A career as a dental hygienist offers an immediate sense of accomplishment because the well-being of patients is enhanced via my interventions as a dental hygienist. As an expert in this field, I will advise patients on a diet, harmful substances to avoid and recommend an oral hygiene routine that can improve their dental conditions. In addition to that, I have a keen interest in the different procedures conducted by dental hygienists and therapists, like teeth restoration, teeth extractions, crown fitting, pulp therapy, polishing, radiography, and scaling. By working hard in school, I will gain the necessary skills to assist patients suffering from various dental issues.

As I conclude, I would like to state categorically that I am a mature student pursuing a career in dental hygiene out of life experiences and after careful consideration of the career requirements. Besides, I am fully aware of the intrigues of the job, having volunteered at the community dental unit. Upon completing my studies, my goal is to ensure that patients suffering from various dental ailments are accorded early intervention and advise them on preventive approaches to managing their dental hygiene. Ladies and gentlemen, that is my mission. Thank you for your attention and for granting me your precious time.
