Lesson 5

1984 is the book created by George Orwell, which envisions what the world could seem like 35 years in the time (this novel was first published in 1949). George Orwell's experience of 1984 takes place in London and portrays the totalitarian regime in which citizens are heavily persecuted, and whoever demonstrates the mark of confrontation or conflict is immediately executed. The main character is Winston Smith, the 35-year-old man who begins his journey towards conflict and corruption when he buys the journal and begins publishing his ideas about the government. Through the course of this book, he undergoes some changes in his ideologies and means of realizing time, which results in him to remain a real active character, giving him a completely different person on each part of the book.

Orwell's of the furthestmost anti-utopian novel during history George Orwell's 1984 is the "dream experience" into the time of the world operated by tyranny (Meyers 144). via the portrayal of Winston Smith, Orwell communicates his pessimistic views on totalitarianism in communist Russia and closely connects these results in the book to real history.

1984 was George Orwell's chilling prediction about this time. And while 1984 has been and started, Orwell's story is timelier than always. 1984 shows the remarkable and haunting experience of this reality, so muscular that it is totally plausible from start to end. No one will deny the power of the book, its grasp on the imaginations of multiple generations of audiences, or the flexibility of its admonitions —the heritage that appears only to grow).
