

1. Research the Skin Penetration Act for your State or Territory (qld,nsw), and identify the correct infection control procedures for each of the following in regards to the micro-dermabrasion treatment:

Scenario	Response/Procedure	Risk
A client is receiving a micro-dermabrasion treatment; blood spotting has occurred and the therapist was not wearing gloves and has come into contact with the blood.	<i>What should the therapist do straight away? What is the procedure for incident reporting in the salon?</i>	<i>If the client had a blood borne disease such as HIV or hepatitis B- would the therapist be at risk of contracting this disease and how?</i>
You are performing micro-dermabrasion treatments in the salon.	<i>What procedures do you follow to ensure the prevention of blood to blood contact?</i>	<i>What are the risks if you did not adhere to these procedures?</i>
You have conducted an extraction using a lancet on the nose area.	<i>How does the therapist dispose of this lancet?</i>	<i>What are the risks if this lancet was disposed of incorrectly?</i>

2. Why does the salon and therapists need to be aware of health and hygiene guidelines and procedures? What are the legal repercussions if these guidelines were not met?

3. What is meant by the term 'immunity'? Identify two (2) factors that affect immunity

4. Outline the purpose of each salon procedure below in regards to the micro-dermabrasion treatment:

Policy and Procedure	How do you do this?	Why is it important?
----------------------	---------------------	----------------------

Using the micro-dermabrasion machine correctly		
Performing regular testing and tagging on the micro-dermabrasion machine		
Ensuring there is clean linen for each client		
Ensuring you adhere to personal hygiene		
Ensuring that the treatment area is cleaned, and equipment and implements are sterilized and disinfected		
Disposing of wastes correctly		

5. Research the Skin Penetration Guidelines for the Public Health Act 2010. Identify three (3) guidelines that the salon should comply with in regards to equipment and the premises for the micro-dermabrasion treatment
