

Week 3 Question – 10 points

This semester, the University of Tennessee is considering requiring all matriculating students (undergraduate and graduate) to submit to a flu vaccine and a Covid-19 vaccine (assuming one is developed and offered). Some students and students' parents object to this. Assuming a lawsuit is filed by students' parents, how would a judge rule? And why? Please limit your answer to 400 words maximum in your response. Utilize content we discuss in this course, this term. Clearly tell me how a judge would rule, and tell me why.
