

SHBBNLS001 Provide manicure and pedicare services

Assessment Task 2: Project

Instructions

This assessment task requires you to research various nail disorders and diseases and then develop and submit a word-processed document which summarises the outcomes of this research. You will have access to the following documentation to assist them during this task:

- Student Salon Policies and Procedures
- Safety Data Sheets (SDS)
- Equipment manuals
- Student Learner Guide

This Assessment Task is in two (2) parts:

Part A) Research & respond to various nail diseases and disorders

Using word-processing software (like Microsoft Word) you are required to create a table based on the following conditions in regards to recognising and responding to nail diseases and disorders. You are required to research the following 29 conditions:

- Tinea Pedis
- Tinea Corpis
- Blue Nails
- Leuconychia
- Beau's Lines
- Pterygium
- Koilonychia
- Paronychia
- Tina ungium
- Onychocryptosis
- Calluses
- Heel fissures
- Corrugations/furrows
- Eczema/dermatitis
- Discoloured nails
- Habit tic
- Onychotrophia
- Splinter haemorrhage
- Blisters
- Bunions
- Corns
- Eggshell nails
- Hammer toes
- Hangnails
- Onychauxis
- Onycholysis
- Onychophagy
- Onychorrhexis
- Brittle nails

For each condition above, in your table you are required to address the following:

- Describe the appearance of this condition
- Provide a picture of the condition (and reference this)
- What is the cause of this condition?
- Can you treat this? If so, what would the treatment be?
- Would you refer this client on to a podiatrist or medical professional?

Part B) Analyse conditions and refer the client

You are required to research the seven (7) conditions listed below which are contraindicated to the manicure or pedicure treatment.

Conditions:

- Allergic reactions
- Diabetics
- Loss of tactile sensation
- Recent fractures of sprains
- Bruising or swelling
- Recent operations
- Cuts and abrasions

For each of the conditions below, identify in your document a table which explains:

- Why you cannot perform the treatment
- Whom you would refer the client on to (a medical professional or podiatrist)

Context of assessment

- This assessment task may be completed unsupervised in a classroom or independent learning environment.
- This assessment must be submitted online in the Learning Management System, unless reasonable adjustments are approved by the Head of Education.

Decision-making rules

To achieve a satisfactory result, you must:

- Submit a completed word-processed document which answer all tasks and activities to an acceptable industry standard.
