Final Assessment F-TAP (20%)				
Semester	:	Summer	Year :	2021
Course Title	:	Effective Thinking		
Course Code	:	SDL 110		
Instructor(s) <small>(Includes names of all instructors teaching this course)</small>	:	Mr.Ahmed ALSalfiti Mrs. Kubra Otkur		
Submission Date	:	(3 August 10:00 am till 8 August 12 pm - noon)		

To be completed by the student

Student Name	:			
Student ID	:	Department	:	
Major	:	Section	:	U1 Version 4
Integrity Statement	:	<i>"I affirm that I completed my assignment on my own abiding by the rules in ACM Student Handbook. I did not receive any external help, use any unlawful resources or commit plagiarism."</i>		
Signature	:			

Grading Scheme

Question	Earned Points	Max. Points	Question	Earned Points	Max. Points
1		15	5		40
2		15			
3		10			
4		20			

Total Earned Points	Total Available Points	Instructor Name
	100	

Important Notes:

- Any attempt at plagiarism will be reported. All ACM handbook academic misconduct rules will be applied.
- It is the responsibility of the student to submit this online exam paper to the instructed online platform (Moodle, Turnitin)

MULTIPLE CHOICE QUESTIONS

Choose the right answer (5x 3pts = 15 pts) TOTAL 15 PTS

1. _____ refers to creating and innovating new ideas.
A. The green thinking hat
B. The red thinking hat
C. The black thinking hat
D. The yellow thinking hat
2. Which of the following refers to “I love the idea”?
A. Red
B. White
C. Blue
D. Black
3. When you consider some points and discussion and come to a decision, this is an example of _____
A. Red hat
B. White hat
C. Blue hat
D. Black hat
4. How much you make, expenses, revenue and expected profit; this is an example of _____
A. Red hat
B. White hat
C. Blue hat
D. Black hat
5. When you have a group project, you start to brainstorm and come up with awesome ideas. Which type of hat is related?
A. Red hat
B. White hat
C. Blue hat
D. Green hat

TRUE AND FALSE QUESTIONS

Choose the right answer (5 x 3pts. = 15 pts) TOTAL 15 PTS

1. As per the black hat, positive thinking doesn't come naturally.	True	False
2. Red hat represents emotions and feelings.	True	False
3. Six Thinking Hats can be used as a tool for problem solving and decision making.	True	False
4. Yellow hat is the opposite of black hat.	True	False
5. The black hat is known as the caution hat.	True	False

Matching

Choose the right answer (5 x 2pts. = 10 pts) TOTAL 10 PTS

1	White Hat	Convenient way of asking for the facts to be put forward in a neutral and objective manner.	Programming hat for human thinking
2	Red Hat	I feel this the right person for this job position.	When you point out what is wrong and what does not fit and what will not work.
3	Black hat	When you point out what is wrong and what does not fit and what will not work.	convenient way of asking for the facts to be put forward in a neutral and objective manner.
4	Green Hat	Creative hat	I feel this the right person for this job position.
5	Blue Hat	Programming hat for human thinking	Creative hat

ESSAY QUESTIONS

1. Explain the differences between vertical thinking and lateral thinking with personal examples? **TOTAL 20 PTS (Your answer should not be less than 150 – 250 words)**

Vertical thinking is a sequence of direct as well as logical procedures which are used in coming to a conclusion. Lateral thinking involves the use of indirect as well as creative methods to aid in coming to a conclusion. An example that can aid in contrasting the main difference vertical and lateral thinking is an individual with lateral thinking may dig a hole for a while and realize it might not be the best spot to dig, therefore why not try digging a hole somewhere else instead.

Basically vertical thinking involves rigid way of thinking it involves sticking to the approach that one has taken prior to beginning and excluding any other technique. Lateral thinking involves thinking on an issue from various angles, if there are a bit controversial and implementing new techniques to same old thing. Lateral thinking tends to be unconventional, creative and generative and illogical. In contrast vertical thinking classical, selective and logical (Tuarez, 2021).

2. The COVID-19 pandemic has affected educational systems worldwide, leading to the near-total closures of schools, early childhood education and care (ECEC) services, universities and colleges. Most governments decided to temporarily close educational institutions in an attempt to reduce the spread of COVID-19.

What are your concerns, criticisms, judgements and dangers, risks that you see about the topic and ideas? Which hat of thinking you are using:

20 points

The temporary closure of educational institutions may lead to increase of crime rate among the children below the age of 18. This is because these children tend to be less occupied and thus they tend to think on the ways that can make quick money. In addition children and young people mostly those from the affected areas have lost an essential aspect which offered them with stability. Therefore the mental health of children has been affected since they have been confined in their homes.

Based on my reasoning, I am currently using the Black hat thinking.

What are the alternatives, solutions, and new ideas etc. about the topic? Which hat of thinking you are using?

20 points

I feel that School closures tend to have a major negative influence on academic achievement as well as on social and emotional learning. School tend to be a hub for social services which are more than academic learning, majority of them allow the enrollment as well as retention of kids as well as young people. Critical services were lost as result of closure of schools.
This is a red hat type of thinking
