## **My Sister's Keeper**

**1.**

I do not think the choice of Sarah and Brian to conceive Anna is morally justified because the purpose of getting her was to save Kate. Similarly, proper preparation is required between the mother and the father for a baby to be created, hence the child's living purpose. Nevertheless, Anna's goal was to save her sister Kate and undergo painful bone marrow extraction surgeries and other parts that could be needed.

**2.**

My Sister's Keeper has several ethical issues, with the first being to conceive a child, Ana to provide parts of her body to her sister Kate. Also, another moral matter concern is that a minor can control their medical history because Ana was genetically engineered to match her sister, who had cancer. Finally, it was ethical for parents to force Ana to provide her kidney and save her sister Kate.

**3.**

I agree with Ana's decision because her parents had put more concentration on one child and forget that she also has a life to live. She deserved to have medical emancipation and the right to give her kidney or not. If I were a judge, I would make the same decision because she is forced to do everything based on Ana's announcement, which she is not happy with. Although she loves her sister, Ana admits part of her wanted her to die to allow her to have freedom with her life (Cassavetes, 2009).

**4.**

Kavya Solanki was born in 2018 as the first savior sibling in India. Kavya's birth was through pre-implantation genetic diagnosis to match the genes with Abhijit, who suffered from thalassemia major. The process went well after extracting born marrow, and Abhijit has now fully recovered, and Kavya is also healthy.

5.

The savior sibling will be required to donate the tissues. For instance, they can utilize the umbilical code blood of the tissue.

6.

We cannot rely on parents and doctors to fiercely protect the savior siblings because they are the ones that conspired to develop them to help the other sibling. Therefore, the mission must be accomplished regardless of the health status of the savior sibling.
