The technology implementation plan is aimed to improve student collaboration in the classroom. Therefore, collaboration plays a critical role in developing students' higher-level thinking skills and enhancing their confidence and self-esteem. The bible refers to God's individual as those that clothe themselves with compassion and kindness. The technology will require students to work together and help each other achieve in their education. Technology implementation plans using google Docs, Kahoot, and Flipgrid are essential in enhancing teamwork. This aligns with the bible on the aspect of teamwork. English Standard Version Bible (2001), in the book of Proverbs chapter 27: 17, emphasizes that "as iron sharpens iron, so one person sharpens another." The book aligns with the goals of being an image-bearer of God because the technology provides an opportunity for the students to work as a team and collaborate in the classroom to attain educational success.

The technological tools implemented also fosters equity among the students. Valentine (2017) stated that equity in education allows all students to develop the knowledge and skills they require to be engaged and become productive members. Every student will have an opportunity to use technology to attain education and lead a better social outcome. This aligns with the bible in the book of 1 Corinthians 18: 14, which states that "David reigned over all of Israel, administering justice and equity to every one of his people" (English Standard Version Bible, 2001). David did not consider any individual as any less and thus served justice efficiently. This technology will be provided in the ratio of 1:1 per student. Therefore, every student will have a chance to use it and enjoy the benefits. Similarly, technology does not limit people with varying abilities because some students are shy and others are disabled. Diversity will encourage creativity among students' (Goethe & Colina, 2018). This aligns with the goals

because the bible in the book of genesis 12:3 emphasizes that all individuals on earth will be blessed through you. Therefore, regardless of individuals' physical or mental abilities, they can easily use the technology and advance in their education careers.
