question 2)

Define Telemedicine and its components. What is your opinion on the increased utilization of telemedicine in delivering health care? Share your own experience. Enumerate the pros and cons.

400-450 words

2 peer review references less than 5 years old APA format

question 3)

You are interested in working for a full-service facility that focuses on prevention and wellness, and you become very excited when your most desired facility contacts you via e-mail expressing interest in your resume and requesting a preliminary telephone interview. During the preliminary telephone interview, the talent acquisition specialist asks whether you believe you could make the transition from the traditional approach of hospital care to their model of care. How should you respond?

400-450 words
