

Social 20-1 Final Major Project

For the past few months, you have been exploring the complexities of nationalism in a variety of national and international contexts. You have examined the origins of nationalism and the influence of nationalism on regional, international and global relations. It is now time to put that knowledge to work. For your final assignment, you will create a **multi-dimensional project** where you demonstrate your understandings of nationalism and how nationalism contributes to the citizenship and identities of peoples in Canada. In your project you must be able to address:

- **a basic understanding of our core concepts (nation, nationalism, and patriotism – what do these mean for Canadians?)**
- **an appreciation of how our history has contributed to Canadian nationalism – were there any events that helped define a Canadian identity or culture?**
- **the positive effects of nationalism on Canada – what has nationalism done to strengthen Canadian unity and culture?**
- **the negative effects of nationalism on Canada – what has nationalism done to weaken Canadian unity and culture?**
- **your will also need to include visuals, citations, and a list of sources**

To achieve this aim, you are free to choose a variety of formats to demonstrate your understanding of nationalism in a Canadian context – PowerPoint, Prezzi, video, written report, or other online format (just make sure you talk to your teacher first).

You will need to conduct online research, organize your information, and cite it properly (even if you include the links that is ok).

The project will be due **Wednesday, June 17th** without exception.
