Acts is the sequel to the truth of Saint. Both were written by Saint, the doctor who traveled with the apostle Paul. Luke's use for writing his truth (see Luke 1:3–4) applies to Acts, too: To make the "coherent" account of the former church after Jesus' resurrection. Acts is the historical account of how the miracle of Christ alters everything through the beginning of the first church. Acts is the history of God's prayer flooding out to this earth. Nothing is more evident in performance than the spreading of the truth. Christ promises the geographical increase at the beginning (Acts 1:8), and turn is the information of his death and revival as it spreads from Jerusalem to Judea, Samaria, and the faraway capital of Rome (Brittle 2016).

Historical Books this set consists of the four Gospels and this volume of the performance. These truths show the testimonies of Matthew, Mark, Luke, and John concerning the building of the Christ. This book of performance is the account of the ministry of some of the mighty's Apostles. The truth may also be split into two groups. Levi, Mark, and Saint are called the synoptic (thinking "see-alike") facts because of their similarities. Saint's testimony is a separate and different person and is believed to have been published specifically to members of the religion (Kucicki, 2017).

Luke, the "dear doctor" (Colossians 4:14 KJV), preacher, and friend of the apostle Paul published both the truth of Saint and the turn of the apostles. Saint is the only Gentile writer of this New Testament. He has long been accepted as the diligent professional scholar by those who have applied his writings in genealogical and past reports. As a scholar, he says that it is his intention to write down the organized account of the time of Jesus from the stories of those who were eyewitnesses (Luke 1:1-4).

Every one of these four arrangements of missionaries at ¹the New Testament (Mark 3:13–19, Matthew 10:1–4, holy person 6:12–16, and execution 1:13) propose ¹that every one of these witnesses were courteous fellows. The sanctioned realities and this book of turn make different groups of the twelve messengers. This rundown in the reality of Saint contrasts ¹from Matthew and Mark in ¹two dimensions. It records "Judas, that kind of holy person" rather than "Thaddeus". (For more information, looks Jude the Apostle.) Unlike the Synoptic truth, the Gospel of Saint does not give the formal database of missionaries. The reality, as per Luke, exhibits a few contrasts from the other Synoptic principle. For instance, Luke is the main truth to get the spin-off, the turn of the Apostles. These two volumes are much of the time alluded to as a solitary segment named Luke-Acts. Another variety among Saint and the distinctive Synoptic is that preface Saint's presentation may likewise be known as the exordium, which is the abstract gadget that was additionally utilized by other Greek creators. There is one emotional likeness between this arrangement of Josephus ' Against Apion and Luke-Acts. Since this volume of execution is the continuation of Luke, it ought to be viewed as when endeavoring to decide the author (Moessner, 2016).
