Version due date: Sunday 7/27 at 11:59 PM PST

Version v.0.1

Abstract

[contents to come v.0.2, max 250 words]

Contents

Contents	3
Version history	3
List of figures and tables	3
Introduction	4
Methods	4
Results	4
Genre analysis and tracing	4
Stage 1: Rapid damage assessment	4
Stage 2: Initial damage assessment	4
Stage 3: Preliminary damage assessment	4
Discussion	5
New data-sharing paradigms	5
Data and information management systems	5
Structured content and architecture	5
Extreme human-computer interaction	5
Local subject experts matter	5
Conclusion	5
References	6
Appendix: Document Profile	7

Version history

[Insert table (optional, extra credit)]

List of figures and tables

[(optional, extra credit)]

Introduction

More to come v.0.2

- Topic
- Purpose
- Audience
- Overview of contents
- Background on the topic, situation, or both

Methods

More to come v.0.2

Results

Genre analysis and tracing

Writing content

Problem

Supporting evidence X, y and Z. paragraph text. Sentence. Sentence. Metadiscourse. Sentence.

“Quite from X”

Y resource

Solution

Stage 1: Rapid damage assessment

More to come v.0.2

Stage 2: Initial damage assessment

More to come v.0.2

Stage 3: Preliminary damage assessment

More to come v.0.2

Discussion

More to come v.0.2

New data-sharing paradigms

Appendix: Document Profile

[List the elements below in whatever order applies]

- **Who to:** ACM SIGDOC
- **Who from:** Hank Aaron
- **What:** ACM SIGDOC Conference
- **When:** this August, Sunday 8/16 at 11:59 PM PST)
- **Where:** Portland, Oregon
- **Why:** To alert decision makers and academics at the next conference about the need for streamlining documentation during disaster declarations throughout Oregon
- **How:** I'll use the summer course to create an initial draft of the experience report to pitch ACM on Published in the Conference Proceedings
