PALLIATIVE CARE NURSING

- Monitor patients
- Direct on the use of medication
- Manage pain
- Offer patients with personalized care
- Control equipment

WORK ENVIRONMENT FOR PALLIATIVE CARE NURSING

- Patient home
- Clinic
- Residential hospices (Johnston et al., 2015)
- Acute in-patient facilities

SPECIAL SKILLS IN PALLIATIVE NURSING

- Communication
- Individual susceptibility
- Sympathy

DEVELOPING PRESENT ROLES OF NURSES

- Primary palliative care nurse has relevant acquaintance to deal with dying patients
- The general capacity to offer pain relief
- RN and APRN have acquittance in palliative care
- Can offer counseling and communication
- Can care for life-limited patients

PALLIATIVE ONCOLOGY NURSING

- Early palliative care ¹ improves the quality of life of patients with cancer
- Connect the opening of continuity while offering physical and psychosocial care (Schroeder & Lorenz, 2018)
- An exceptional place to promote authorized and moral facets of care

ENHANCING PRESENT NURSING SKILLS

- Implementation of ELNEC curricula
- ELNEC offers education in ninety nations (Schroeder & Lorenz, 2018)
- Online and classroom selections for college certificates
- Stanford provides online resources for palliative care to international students

INDIVIDUAL PRACTITIONERS

- Independent physicians presented in ENABLED studies
- ENABLED comprises of 4 sittings and at least one monthly follow up with patients (Schroeder & Lorenz, 2018)
- The sittings concentrated on the quality of life and communication

CHANGES IN HEALTHCARE

- APRN performs evaluation and intervention of illness procedures
- Encourages independence and safe evolutions
- Develops a gullible relationship with patients (Mills et al., 2017)
- Therapeutic care has concentrated on cure-oriented care
- The need to integrate cure-oriented and palliative care

SUPPORTING COMMUNITY EXERCISE

- Patients with end-of-life diseases desire to be home alone
- Palliative care delivers care using a developed delivery scheme
- Utilizes collective partnerships with social workers and clinicians
- Nurses assist in organizing, distributing, and managing care in the home
- Maintain an individual's life by enhancing the quality of life

HOME VISITS

- Palliative care nurses provide professional consultation at home
- Utilized to reduce time wastage
- Home-based palliative care can be used in different areas
- Different professionals can work together

BENEFITS OF HOME-BASED PALLIATIVE CARE

- Organized care
- Decreased cost
- Shorten hospital stay
- Enhanced care for patient and chronic diseases
- Reduced acute care visits

TELEHEALTH UTILIZATION

- Enhanced clinical results
- Improved patient satisfaction (Schroeder & Lorenz, 2018)
- Decreased rates of hospitalization
- Allows a real-time interaction between nurses and patients
- Use of audio and video conferencing simultaneously

CONCLUSIONS

- Nurses are vital in palliative care
- Professional nursing practice is required to enhance the ²quality of life
- Patients with end-of-life illness require palliative care
- Home-based palliative care allows collaboration of different professionals in enhancing care
- The use of telehealth has enhanced patient care delivery
