### **Philosophy Class Experience**

In this week's class, I loved how articulately you presented the philosophy perspectives. The whole teaching process was made easy to grasp because you particularly used simple terms to explain the key terms used in the journal's discussion. Your formulations of the questions enable me to understand this week's discussion of the course easily. For this reason, I find the journal a great way for me to express concerning this week's teaching process and, by large, every class of this course. One of the greatest take-away points I grasped from this course is how to handle questions that I believe will help me perform well in my main examination as far as this course is concerned. Truly, professor, I have found this course helpful and interesting, and I have enjoyed every bit of the lessons so far. Additionally, I have to thank you for the dedication you put in ensuring that all your students get the best; I am happy to be one of the beneficiaries of your hard work.

The course has added to my knowledge I acquired from the previous classes, most specifically on the constructive and literature course. It has made me be better equipped with literature composure. In the future, I will put my knowledge and strategies from the class to ensure that I tackle life experiences in society both in my personal life and career. Because of your dedication and experience in class content delivery to your students, I have found philosophy a very interesting field of study that I now think of pursuing at greater levels. You have guided me in particular; in a friendly manner, and your classes have been student-oriented content delivery, which has made me like philosophy course to a greater extent. I am looking forward to more interaction with you in many such classes, and I hope you have a wonderful summer and always remember to keep safe.
